

Project Brief

Redwood Road, 10600 South to 12600

**2007 Legislative
Update**

Provided By:

Project Description: CONSTRUCTION, Roadway Reconstruction with Widening

This is an urban reconstruction and widening project with raised median treatments, side street realignments and various utility and irrigation easements. The purpose of the project is to improve the mobility of the corridor and accommodate future travel demand through the 2030 design year. Improvements will provide a safe and efficient multi-modal facility (accommodating vehicular, pedestrian, bicycle and transit uses) as well as correct geometric, lighting and drainage problems.

By the 2030 design year, traffic is expected to nearly double along Redwood Road in this area, and traffic is already diverting to local roads to avoid congestion. When the project is complete, intersections may still be congested, but the overall average delay will decrease more than 30 percent.

The project is currently under construction, with completion projected for fall 2007. the construction contractor is Geneva Rock Inc..

A Public Information Manager has been assigned to this project to keep local businesses, residents and commuters informed of construction impacts. For information call the project hotline, 579-2464, or visit the project Website, www.udot.utah.gov/redwood104to126 .

NOTE: Schedule information listed above is estimated and could change without notice based on funding, scheduling constraints, stakeholder issues, and other unanticipated project elements.
